

RYAN BOWLER

Full-Stack Web Developer

SUMMARY

A passionate Full Stack Developer and professional problem solver who loves to build things! Whether it's crafting a sleek front-end or getting into the nitty-gritty of the back-end, I love what I do—and I'm always up for the next challenge.

PROJECTS

Better Spanish (Typescript, React, Next.js, Express, PostgreSQL, Tailwind)

A Spanish language learning app design to speed up fluency with a focus on high frequency words.

Dev Trainer (Typescript, React, Next.js, Express, MongoDB, Tailwind)

An app that acts as a reference and learning aid to developers. It allows you to create lists of things like shortcuts and code snippets that you often need to use but forget.

Shoe Junky (Typescript, React, Next.js, Express, MongoDB, SCSS)

An e-commerce site with product filtering and search as well as a functioning cart and stripe payments.

WORK EXPERIENCE

Bruce Rock Engineering - April 2022 to Jan 2023

I was in charge of the technical drawing department and tasked with overhauling drawing procedures. I oversaw and implemented vast amounts of improvements in the quality of drawing output and laid procedural foundations. I also built a suite of scripts to automate design workflows.

Mettler-Toledo - August 2020 to Jan 2022

KMG June 2020 to August 2020

Mettler-Toledo - October 2019 to April 2022

ABOUT ME

Travelling is a huge part of my life, and I feel lucky to have explored so many different parts of the world. When I'm not coding, you can usually find me out skateboarding or at the gym, I love staying active and being outdoors as much as possible.
