Ryan Bowler
Full Stack Developer

📍 Perth, WA
📞 +61466027037
Visa Status: Resident

Full-stack developer and seasoned engineering professional with over a decade of experience solving complex problems and improving systems. Skilled in modern web development and process optimisation, with a proven ability to deliver solutions. I'm driven by curiosity, craftsmanship, and a genuine love for building.

Work Experience

Full Stack Developer - Kinori (August 2025 to present) 📍New York, USA (remote)
- Managed and built full-stack software solutions for a healthcare platform with React, Node.js and Typescript.
- Worked with the founder to shape product strategy, and align technical decisions with business goals.
- Operated across the stack adapting quickly to evolving needs, practising agile problem solving.
- Collaborated effectively in a team environment, communicating clearly to drive decisions and momentum.

Design Engineer - Bruce Rock Engineering (April 2022 to April 2024) 📍Perth, Western Australia
- Built tools in VB.NET that automated a range of repetitive engineering design tasks.
- Implemented new engineering design procedures to improve communication and quality of the final product.
- Managing and building engineering technical documentation processes.

Design Engineer - Mettler-Toledo (August 2020 to Jan 2022) 📍Royston, England
- Maintaining and developing new and existing mechanical designs with the use of specialised 3D software.
- Managed and evolved an assigned product range as an SME, providing technical guidance and driving design improvements.
- Reviewing and auditing others' work to maintain a high design standard across the department.

Design Engineer - KMG (June 2020 to August 2020) 📍Sandy, England
Design Engineer - Mettler-Toledo (October 2019 to April 2020) 📍Royston, England
